Introduction

1. The IFRS Interpretations Committee (the Interpretations Committee) received a request relating to the interaction between IFRS 9 *Financial Instruments* and IAS 28 *Investments in Associates and Joint Ventures*—Long-term interests. Specifically, the request related to whether an entity applies IFRS 9, IAS 28 or a combination of both Standards, to the measurement of long-term interests in an associate or a joint venture that, in substance, form part of the net investment in the associate or joint venture, but to which the equity method is not applied (long-term interests).

2. The Interpretations Committee observed that the feedback from outreach activities indicated that entities apply diverse reporting methods in accounting for long-term interests, and the issue is widespread. In response to the noted diversity in practice, the Interpretations Committee decided to develop an Interpretation, after considering the Interpretations Committee’s agenda criteria described in paragraphs 5.14–5.22 of the *IFRS Foundation Due Process Handbook* (the Due Process Handbook).

3. At its September 2016 meeting, the Interpretations Committee completed its discussion of the issue and directed the staff to prepare the ballot draft of the draft interpretation.
4. In accordance with paragraph 7.7 of the Due Process Handbook, we present this Agenda Paper to the Board to:

(a) provide the Board with a summary of the Interpretations Committee’s general agreement;

(b) ask the Board to confirm it is satisfied that the Interpretations Committee has complied with all due-process requirements to date; and

(c) recommend a comment period of no less than 90 days for the draft Interpretation.

Issue raised

5. Paragraph 2.1(a) of IFRS 9 states that interests in associates and joint ventures that an entity accounts for applying IAS 28 are excluded from the scope of IFRS 9. Paragraph 14 of IAS 28 further explains this scope exception:

IFRS 9 Financial Instruments does not apply to interests in associates and joint ventures that are accounted for using the equity method. […]

6. Paragraph 38 of IAS 28 requires that, when an entity allocates its share of losses of an associate or a joint venture to the carrying amount of its investment in that associate or joint venture, the entity allocates such losses to both:

(a) interests that it accounts for using the equity method; and

(b) long-term interests that, in substance, form part of the net investment.

7. In this respect, paragraph 38 states (emphasis added):

[...] The interest in an associate or a joint venture is the carrying amount of the investment in the associate or joint venture determined using the equity method together with any long-term interests that, in substance, form part of the entity’s net investment in the associate or joint venture. […]
8. Paragraphs 40 and 41A–43 of IAS 28 then go on to explain that this net investment is subject to impairment testing. More precisely:

(a) an entity is first required to assess whether there is any objective evidence that the net investment is impaired, by considering the indicators included in paragraphs 41A–41C of IAS 28. These indicators were largely transferred from IAS 39 Financial Instruments: Recognition and Measurement as part of the development of IFRS 9.

(b) if the assessment of evidence indicates that the net investment is impaired, the entity is required to measure impairment applying the impairment requirements in IAS 36 Impairment of Assets.

9. In the light of these requirements in IFRS 9 and IAS 28, the submitter asked whether paragraph 2.1(a) of IFRS 9 should be interpreted to exclude long-term interests from the scope of IFRS 9, in particular the impairment requirements of that Standard. In other words, the question is whether an entity assesses long-term interests for impairment by applying only the requirements in IAS 28, only those in IFRS 9, or a combination of the requirements in both Standards.

10. The submitter of the issue says that diversity exists in practice applying IAS 39. However, this has not been perceived to be a significant issue because of the similarity of the impairment models in IAS 28/IAS 36 and IAS 39. With the introduction of an expected credit loss model in IFRS 9, the submitter thinks that the effects of such diversity are likely to be more significant.

11. The draft Interpretation will address the application of the requirements in IFRS 9 and IAS 28 to long-term interests.
Summary of the Interpretations Committee’s general agreement

Accounting for long-term interests

12. Based on the wording of the requirements in IFRS 9 and IAS 28, the Interpretations Committee concluded that the requirements of IFRS 9, including those relating to impairment, apply to long-term interests in an associate or a joint venture to which the equity method is not applied. In other words, the scope exception in paragraph 2.1(a) of IFRS 9 does not apply to such long-term interests. In reaching this conclusion, the Interpretations Committee noted the following:

(a) the scope exception in paragraph 2.1(a) of IFRS 9 applies only to interests in an associate or a joint venture that an entity accounts for using the equity method. This view is consistent with the clarification provided in paragraph 14 of IAS 28, which states that ‘IFRS 9 Financial Instruments does not apply to interests in associates and joint ventures that are accounted for using the equity method’.

(b) interests, described as ‘long-term interests’ in IAS 28, are not accounted for using the equity method. Although long-term interests are subject to one part of the equity method procedures (ie the allocation of losses), this is not the same as saying that an entity accounts for such long-term interests using the equity method. Paragraphs 3 and 10 of IAS 28 describe aspects of the equity method beyond merely allocating losses. The Interpretations Committee observed that this interpretation is consistent with the requirements in paragraph 38 of IAS 28 (reproduced in paragraph 7 of this paper). Paragraph 38 explains that the interest in an associate or a joint venture, subject to the allocation of losses, is the investment accounted for using the equity method together with long-term interests that form part of the net investment.

---

1 For further details of the past discussions and meetings, see the project page on the IASB website: http://www.ifrs.org/Current-Projects/IASB-Projects/IFRS-9-and-IAS-28-Measurement-of-long-term-interests/Pages/default.aspx
13. The Interpretations Committee also noted that the expected credit loss impairment model in IFRS 9 is part of, and interlinked with, amortised cost accounting in IFRS 9. For example, how interest revenue is calculated depends on whether the related financial asset is credit-impaired. The Interpretations Committee agreed that:

(a) it is difficult to see how the amortised cost accounting in IFRS 9 would work in the absence of the impairment requirements in IFRS 9; and

(b) the point described in subparagraph (a) above indicates that the Board did not intend the measurement requirements in IFRS 9 to be applied in isolation of the impairment requirements.

14. On the basis of the analysis in paragraphs 12–13, the Interpretations Committee concluded that the scope exception in paragraph 2.1(a) of IFRS 9 does not apply to long-term interests. Consequently, long-term interests are subject to all of the requirements in IFRS 9, and the loss allocation and impairment requirements in IAS 28.

15. The Interpretations Committee understood this conclusion to mean the following:

(a) an entity accounts for long-term interests applying IFRS 9, including the impairment requirements in IFRS 9;

(b) in allocating any losses of the associate or joint venture applying the requirements in paragraph 38 of IAS 28, the entity includes the carrying amount of those long-term interests (determined applying IFRS 9) as part of the net investment to which the losses are allocated;

(c) the entity then assesses for impairment the net investment in the associate or joint venture, of which the long-term interests are a part, by applying the requirements in paragraphs 40 and 41A–43 of IAS 28; and

(d) if an entity allocates losses or recognises impairment applying steps (b) and (c) above, it ignores those losses or that impairment when it accounts for long-term interests applying IFRS 9 in subsequent periods.
Presentation and disclosure

Presentation

16. Paragraph 38 of IAS 28 requires an entity to allocate its share of an associate’s losses to the equity method investments and long-term interests in the reverse order of seniority. However, IAS 28 does not specify whether or how the entity allocates impairment losses recognised on the net investment between these components of the net investment.

17. IAS 1 Presentation of Financial Statements requires an entity to present investments accounted for using the equity method separately from long-term interests, and such presentation would require an allocation of impairment losses recognised applying IAS 28. Consequently, the Interpretations Committee decided that it would be helpful to specify that an entity allocates such impairment losses between the equity method investments and long-term interests in the same order as specified in paragraph 38 of IAS 28 for a loss allocation (ie in the reverse order of seniority).

Disclosure

18. The Interpretations Committee concluded that it is important that entities provide information that enables users of financial statements to understand the effects of long-term interests on entities’ financial statements.

19. The Interpretations Committee noted that currently there are a number of disclosure requirements that apply to long-term interests. Examples of such disclosure requirements are:

(a) IFRS 12 Disclosure of Interests in Other Entities—paragraph 20 requires an entity to disclose information that enables users to evaluate the nature, extent and the financial effects of its interests in an associate, which include long-term interests.

(b) IFRS 7 Financial Instruments: Disclosures—which, among others, requires an entity to disclose:
(i) for financial assets measured at amortised cost, the carrying amounts (paragraph 8(f)) and a reconciliation of the opening to closing balance of the loss allowance (paragraph 35H);

(ii) for financial assets measured at fair value through profit or loss (FVPL), the carrying amounts (paragraph 8(a)); and

(iii) significant accounting policies used that are relevant to an understanding of the financial statements (paragraph 21).

(c) IAS 24 Related Party Disclosures—paragraph 18 requires an entity to disclose separately for associates and joint ventures:

(i) the amount of outstanding balances;

(ii) provisions for doubtful debts related to the amount of outstanding balances; and

(iii) the expense recognised during the period in respect of bad or doubtful debts.

20. Considering these existing disclosure requirements, the Interpretations Committee decided not to propose any new disclosure requirements specifically for long-term interests. Instead, the Interpretations Committee decided that the draft Interpretation should direct entities to the overall objective in IFRS 12 to ensure that they disclose information that helps users of financial statements to understand the financial effects of long-term interests.

Illustrative example

21. The Interpretations Committee decided that the draft Interpretation should include an illustrative example. This is because the Interpretations Committee suggested that such an illustrative example would be helpful in explaining the proposals in the draft Interpretation.

22. The Interpretations Committee also discussed the scenarios that such an illustrative example should address, and decided it should be along the lines of the example described in Appendix B to this paper.
Transition requirements, including those for first-time adopters

23. The Interpretations Committee decided that the draft Interpretation require retrospective application. The Interpretations Committee suggested that retrospective application would be feasible for the draft Interpretation because an entity would be likely to have sufficient information to implement the proposals retrospectively. Paragraph 39 of IAS 28 implicitly requires an entity to track the amount of losses attributable to the entity’s interests in an associate.

24. The Interpretations Committee also decided that the draft Interpretation provide entities with relief from presenting comparative information applying the draft Interpretation. In reaching this decision, the Interpretations Committee considered that:

(a) the draft Interpretation interprets the requirements in IFRS 9 as well as IAS 28;

(b) IFRS 9, which becomes effective on 1 January 2018, also provides the same relief on its initial application; and

(c) the draft Interpretation proposes an effective date of 1 January 2018. The Interpretations Committee suggested that an option not to restate the comparative information would alleviate any potential concern that there is a short period between the expected issue date of the Interpretation and the proposed effective date.

25. The Interpretations Committee also decided that an entity should restate comparative information applying the draft Interpretation if it chooses to do so when initially applying IFRS 9. This is because, in that case, the entity would account for long-term interests in a consistent and comparable way across reporting periods.

26. In summary, the Interpretations Committee concluded that the draft Interpretation:

(a) require retrospective application of the proposals; but
(b) permit an entity not to restate comparative information applying the Interpretation, unless the entity chooses to restate the comparative information on initial application of IFRS 9.

_Transition requirements for insurers applying the temporary exemption from IFRS 9_

27. The Interpretations Committee also considered the transition requirements for those entities that will elect to apply the temporary exemption from IFRS 9. The Interpretations Committee observed there might be insufficient time for such entities to apply the Interpretation retrospectively if they did not apply IAS 39 previously to long-term interests. Consequently, the Interpretations Committee decided that the draft Interpretation provide relief from presenting comparative information applying the Interpretation for these entities as is proposed for all other entities.

28. Appendix C to this paper summarises the Interpretations Committee’s tentative decisions on the transition requirements for the draft Interpretation as described in paragraphs 23–27.

_First-time adopters_

29. Paragraph E1 of IFRS 1 _First-time Adoption of International Financial Reporting Standards_ provides short-term relief to first-time adopters from presenting comparative information that complies with IFRS 9. This short-term relief is available for first-time adopters whose first IFRS reporting period begins before 1 January 2019. For the same reasons provided in paragraph 24 of this paper, the Interpretations Committee decided that the draft Interpretation should provide those first-time adopters with relief from presenting comparative information that complies with the Interpretation, unless they choose to restate the comparative information relating to IFRS 9 on initial adoption of IFRS Standards.
Effective date

30. The Interpretations Committee decided that the draft Interpretation should propose an effective date of 1 January 2018 because the Interpretation would interpret the application of the requirements in IFRS 9, as well as IAS 28.

31. The Interpretations Committee considered that such an effective date would be feasible because entities are likely to have sufficient information to implement the proposals in the draft Interpretation. This is because:

(a) the initial application of IFRS 9 requires an entity to determine a carrying amount for long-term interests applying the requirements in IFRS 9. In effect, this ‘resets’ the carrying amount of long-term interests, previously determined applying other Standards.

(b) the proposals in the draft Interpretation do not affect how an entity measures long-term interests applying IFRS 9. In other words, the draft Interpretation is consistent with the initial application of IFRS 9.

(c) paragraph 39 of IAS 28 implicitly requires an entity to track the amount of losses attributable to the entity’s interests in an associate or a joint venture.

(d) as discussed in the previous section, the draft Interpretation proposes transition relief from presenting comparative information.

Comment period

32. Paragraph 7.11 of the Due Process Handbook says that the Board and the Interpretations Committee ‘usually allow a minimum period of 90 days for comments on a draft Interpretation’.

33. When publishing previous Exposure Drafts of draft Interpretations, the Board and the Interpretations Committee have generally allowed a period of 90 days for comments. In considering the proposals to be included in this draft Interpretation, we see no reason to conclude that a longer comment period would be required.
Consequently, we suggest that the comment period for this draft Interpretation should be no less than 90 days.

**Proposed timetable for balloting and publication of the draft Interpretation**

34. We expect the balloting process of the draft Interpretation will start in October 2016. We expect the draft Interpretation to be ready for publication in the fourth quarter of 2016.

**Confirmation of due process steps**

35. In Appendix A to this paper, we have summarised the due process steps that we have taken and will take in developing and publishing the draft Interpretation. We note that the required due process steps applicable to date for the development and publication of the draft Interpretation have been completed.

**Next steps**

36. Subject to the Board’s responses to the questions below:

   (a) the Interpretations Committee members will be asked to ballot the draft Interpretation; and

   (b) the Board members will be asked if they object to the release of the draft Interpretation.

37. Provided no more than four Interpretations Committee members vote against the draft Interpretation and no more than three Board members object, the draft Interpretation will be published for public comment.
## Questions for the Board

1. Does any Board member intend to object to the release of the draft Interpretation during the future balloting process?

2. Is the Board satisfied that the due process requirements relating to the development and publication of the draft Interpretation have been met?

3. Does the Board agree with a comment period of no less than 90 days for the draft Interpretation?
### Appendix A—Confirmation of due process steps in the development and publication of a draft Interpretation

A1. The following table sets out the due process steps followed by the Board and the Interpretations Committee:

<table>
<thead>
<tr>

Appendix B—Example illustrating the accounting for long-term interests

B1. The assumptions used for the example are as follows:

(a) Investor has the following types of interests in Associate:

(i) ordinary shares representing a 40 per cent ownership interest to which Investor applies the equity method (Equity Method investment);

(ii) preference shares that form part of the net investment in Associate and that are measured at FVPL applying IFRS 9 (Preference Share); and

(iii) a long-term loan that forms part of the net investment in Associate and that is measured at amortised cost applying IFRS 9 (Loan). The effective interest rate of the Loan is 5 per cent.

(b) For simplicity, throughout the illustrated periods, there has not been any objective evidence that the net investment in Associate is impaired applying IAS 28, nor a significant increase in the credit risk associated with Loan.

(c) The amount of initial investment in the Equity Method investment, Preference Share and Loan are CU200, CU100 and CU100, respectively.

(d) Investor does not have any legal or constructive obligation nor has it made payments on behalf of Associate, as described in paragraph 39 of IAS 28. Consequently, Investor no longer recognises its share of Associate’s losses once the carrying amount of its net investment in Associate is reduced to zero.
(e) The following table shows Associate’s net income (loss) for each period and the carrying amount at the end of each period for the Preference Share and Loan applying IFRS 9 (but before applying IAS 28):

<table>
<thead>
<tr>
<th>At the end of</th>
<th>Carrying amount of interest</th>
<th>Net Income/(Loss) of Associate</th>
<th>Preference Share applying IFRS 9 (fair value)</th>
<th>Loan applying IFRS 9(^2) (amortised cost)</th>
</tr>

B2. Based on these assumptions, Investor make the following journal entries:

At initial recognition
DR. Equity Method investment  
DR. Preference Share  
DR. Loan  
CR. Cash  

To recognise the amounts invested in Associate

At the end of period 1

DR. Preference Share  
CR. Profit or loss  

To recognise the change in fair value (CU110 – CU100)

DR. Profit or loss  
CR. Loan loss allowance (Loan)  

To recognise an increase in Loan loss allowance

DR. Equity Method investment  
CR. Equity method income  

To recognise Investor’s share of Associate’s profit (CU50 × 40%)  

The carrying amount of Equity Method investment, Preference Share and Loan, net of allowance, at the end of period 1 is CU220, CU110 and CU90, respectively.

\(^2\) These amounts are shown net of the loan loss allowance.
Period—2
DR. Profit or loss
CR. Preference Share
To recognise the change in fair value (CU90 – CU110)

DR. Profit or loss
CR. Loan loss allowance (Loan)
To recognise an increase in Loan loss allowance

DR. Equity method loss
CR. Equity Method investment
To recognise Investor’s share of Associate’s loss (CU200 × 40%)

The carrying amount of Equity Method investment, Preference Share and Loan, net of allowance, at the end of Period—2 is CU140, CU90 and CU70, respectively.

Period—3
DR. Profit or loss
CR. Preference Share
To recognise the change in fair value (CU50 – CU90)

DR. Profit or loss
CR. Loan loss allowance (Loan)
To recognise an increase in loan loss allowance

DR. Equity method loss
CR. Equity Method investment
CR. Preference Share
CR. Loan
To recognise Investor’s share of Associate’s loss allocated in reverse order of seniority (CU500 × 40%)

The carrying amount of Equity Method investment, Preference Share and Loan, net of allowance, at the end of Period—3 is zero, zero and CU40, respectively.

Period—4
DR. Profit or loss
CR. Preference Share
To recognise the change in fair value (CU40 – CU50)

DR. Equity method loss
DR. Preference Share
CR. Loan
CR. Equity method profit
To recognise Investor’s share of Associate’s loss

Investor recognises and allocates equity method profit of CU10 to Preference Share so that the carrying amount of the interest is not below zero.
Investor limits the allocation of Associate’s losses to CU30 because the net investment in Associate has been reduced to zero. Consequently, there is an unrecognised loss of CU30 (CU150 × 40% – CU40 recognised + CU10 reversed).

Each of the carrying amount of Equity Method investment, Preference Share and Loan, net of allowance, at the end of Period—4 is zero.

Period—5
DR. Preference Share  CU20
CR. Profit or loss  CU20
To recognise the change in fair value (CU60 – CU40)

DR. Loan loss allowance (Loan)  CU10
CR. Profit or loss  CU10
To recognise a decrease in loan loss allowance

DR. Equity method loss  CU30
CR. Preference Share  CU20
CR. Loan loss allowance (Loan)  CU10
To recognise the previously unrecognised share of Associate’s losses

Investor allocates the previously unrecognised share of Associate’s losses of CU30 to Preference Share and Loan because those interests have a positive carrying amount to which losses can be allocated.

Each of the carrying amount of Equity Method investment, Preference Share and Loan, net of allowance, at the end of Period—5 is zero.

Period—6
DR. Preference Share  CU20
CR. Profit or loss  CU20
To recognise the change in fair value (CU80 – CU60)

DR. Loan loss allowance (Loan)  CU10
CR. Profit or loss  CU10
To recognise a decrease in loan loss allowance

DR. Equity Method investment  CU80
DR. Preference Share  CU60
DR. Loan  CU60
CR. Equity method income  CU200
To recognise Investor’s share of Associate’s profit (CU500 × 40%)

Investor allocates Associate’s profit to each interest in the order of seniority. Investor limits the allocation of Associate’s profit to the Preference Share and Loan to the amount of equity method losses previously allocated to those interests, which in this case is CU60 for both interests.

The carrying amount of Equity Method investment, Preference Share and Loan, net of allowance, at the end of Period—6 is CU80, CU80 and CU70, respectively.
Period—7

DR. Preference Share  
CR. Profit or loss
CU30  
CU30

To recognise the change in fair value (CU110 – CU80)

DR. Loan loss allowance (Loan)  
CR. Profit or loss
CU20  
CU20

To recognise a decrease in loan loss allowance

DR. Equity Method investment  
CR. Equity method income
CU200  
CU200

To recognise Investor’s share of Associate’s profit
(CU500 × 40%)

The carrying amount of Equity Method investment, Preference Share and Loan, net of allowance, at the end of period 6 is CU280, CU110 and CU90, respectively.

Periods—1–7

DR. Cash  
CR. Interest revenue
CU5  
CU5

To recognise interest revenue on Loan

Investor ignores the allocation of losses to the Loan for the purpose of measuring interest revenue on the Loan. Consequently, Investor calculates interest revenue for Periods—1–7 using the gross carrying amount of the Loan of CU100 and the effective interest rate of 5 per cent.
B3. The following summarises the balance of, and allocation of losses for, each interest in Associate at the end of and during each period:

| **Variation 2A (paragraph 24)**            |                                               |
| Entity applies IFRS 9, and does not restate comparatives, including the Interpretation: and | Comparatives       | Current       |
| (a) Entity has previously applied IAS 39 to its long-term interests | IAS 39                                        | IFRS 9         |
| (b) Entity has not previously applied IAS 39 to its long-term interests | Other                                         | IFRS 9         |

| **Variation 2B (paragraph 26)**            |                                               |
| Entity applies IFRS 9, and does not restate comparatives. But Entity chooses to restate comparatives applying the Interpretation. | Comparatives       | Current       |
|                                            | IAS 39                                       | IFRS 9         |

**Insurers applying the temporary exemption from IFRS 9**

| **Variation 3 (paragraph 27)**             |                                               |
| Entity applies IAS 39, and chooses not to restate comparatives applying the Interpretation: and | Comparatives       | Current       |
| (a) Entity has previously applied IAS 39 to its long-term interests | IAS 39                                        | IAS 39         |
| (b) Entity has not previously applied IAS 39 to its long-term interests | Other                                         | IAS 39         |

| **Variation 4 (paragraph 27)**             |                                               |
| Entity applies IAS 39, and chooses to restate comparatives applying the Interpretation. | Comparatives       | Current       |
|                                            | IAS 39                                       | IAS 39         |
